ABSTRACT

This publication describes the characteristics of a database developed from a Fall 1992 survey of graduate students and post-doctorates in science and engineering. The survey universe included 333 doctorate-granting institutions and 275 master's-granting institutions. Section 1 offers general notes on data limitations and availability and a summary of general findings. Section 2 presents a description of the survey methodology and response analysis. Section 3 lists the institutions surveyed by degree level, and identifying codes. Section 4 displays copies of the survey instruments and summary questionnaire facsimiles containing data for all departments or for selected groups of departments. The facsimiles present data for all institutions, by broad science and engineering field, and summary statistics for doctorate-granting institutions, master's-granting institutions, and other selected groups of institutions. Highlights of the data include the following: (1) 1992 showed a 4 percent increase over 1991 in graduate students enrolled in master's and doctoral programs in science, engineering, and health fields; (2) the number of women enrolled in science and engineering continued to rise more quickly than the number of men: women increased by 6 percent and men by a little less than 3 percent; and (3) numbers of social science students and earth, atmospheric, and ocean science students increased the most rapidly. Availability of Publications

Single copies are available free of charge from the Division of Science Resources Studies, National Science Foundation, Arlington, VA 22230. If you are a user of electronic mail and have access to Internet, you may order publications electronically. Internet users should send requests to pubs@nsfgov. In your request, include the NSF publication number and title, number of copies, your name, and a complete mailing address. Printed publications may also be ordered by fax (703-644-4278). Publications should be received within 3 weeks after receipt of request. See page iv for availability of science and technology data on the Science and Technology Information System (STIS).

ACKNOWLEDGMENTS

The fall 1992 Survey of Graduate Students and Postdoctorates in Science and Engineering was guided by J.G. Huckenpöhler, Ph.D., Science Resources Analyst, Division of Science Resources Studies, Science and Engineering Education and Human Resources Program (EDU), National Science Foundation, under the direction of Mary J. Golladay, Ph.D., Program Director, EDU. The National Institutes of Health cosponsored the survey.

The fall 1992 survey was conducted by Quantum Research Corp. (QRC) of Bethesda, MD, under NSF contract number SRS-91-00714. QRC staff members who worked on this project were Barbara K. DePaul, Eyvette Harris, Pamela G. Krones, John N. Lewis, Chuck Lyon, George J. Nozicka, Betsy Peto, and Steve Toleque.

STIS

The Science & Technology Information System (STIS) at the National Science Foundation

What is STIS?

STIS is an electronic dissemination system that provides fast, easy access to National Science Foundation (NSF) publications. There is no cost to you except for possible long-distance phone charges. The service is available 24 hours a day, except for brief weekly maintenance periods.

What Publications are Available?

Publications currently available include:

- The *NSF Bulletin*
- Program announcements and "Dear Colleague" letters
- General publications and reports
- Press releases, Other NSF news items
- NSF organizational and alphabetical phone directories
- NSF vacancy announcements
- Award abstracts (1989-now)

Our goal is for all printed publications to be available electronically.

Access Methods

There are many ways to access STIS. Choose the method that meets your needs and the communication facilities you have available.

Electronic Documents Via E-Mail. If you have access to Internet e-mail, you can send a specially formatted message, and the document you request will be automatically returned to you via e-mail.

Anonymous FTP. Internet users who are familiar with this file transfer method can quickly and easily transfer STIS documents to their local system for browsing and printing.

On-Line STIS. If you have a VT100 emulator and an Internet connection or a modem, you can log on to the on-line system. The on-line system features full-text search and retrieval software to help you locate the documents and award abstracts that are of interest to you. Once you locate a document, you can browse through it on-line or download it using the Kermit protocol or request that it be mailed to you.

Direct E-Mail. You can request that STIS keep you informed, via e-mail, of all new documents on STIS. You can elect to get either a summary or the full text of new documents.

Internet Gopher and WAIS. If your campus has access to these Internet information resources, you can use your local client software to search and download NSF publications. If you have the capability, it is the easiest way to access STIS.

Getting Started with Documents Via E-Mail

Send a message to the Internet address **stisserv@nsf.gov**. The *text* of the message should be as follows (the Subject line is ignored):

get index

You will receive a list of all the documents on STIS and instructions for retrieving them. Please note that all requests for electronic documents should be sent to **stisserv**, as shown above. Requests for printed publications should be sent to **pubs@nsf.gov.**

Getting Started with Anonymous FTP

FTP to *stis.nsf.gov*. Enter *anonymous* for the username, and your E-mail address for the password. Retrieve the file "index". This contains a list of the files available on STIS and additional instructions.

Getting Started with The On-Line System

If you are on the Internet: *telnet stis.nsf.gov*. At the login prompt, enter *public*.

If you are dialing in with a modem: Choose 1200, 2400, or 9600 baud, 7-E-1. Dial (703) 306-0212 or (703) 306-0213

When connected, press *Enter*. At the login prompt, enter *public*.

Getting Started with Direct E-Mail

Send an E-mail message to the Internet address **stisserv@nsf.gov**. Put the following in the text:

get stisdirm

You will receive instructions for this service.

Getting Started with Gopher and WAIS

The NSF Gopher server is on port 70 of **stis.nsf.gov.** The WAIS server is also on **stis.nsf.gov.** You can get the ".src" file from the "Directory of Servers" at **quake.think.com.** For further information contact your local computer support organization.

SECTION I. GENERAL NOTES

The data described in this report were collected in the 21st annual National Science Foundation/National Institutes of Health (NSF/NIH) Survey of Graduate Students and Postdoctorates in Science and Engineering, covering fall 1992. This publication describes the survey and characteristics of the database. The survey universe is composed of all U.S. institutions with departments or programs offering courses of study at the postbaccalaureate level in any science and engineering (S&E) field. Medical schools and other specialized institutions in health-related fields with postdoctoral programs or S&E master's or doctoral programs are also included. The 1992 survey universe included 333 doctorate-granting institutions and 275 master's-granting institutions.

Section II presents a description of the survey methodology and response analysis. Section III lists the institutions surveyed, by degree level, along with their identifying Federal Interagency Committee on Education (FICE) codes.

Section IV displays copies of the survey instruments, along with summary questionnaire facsimiles containing data for all departments or for selected groups of departments. The facsimiles present data for all institutions, by broad science and engineering field, and summary statistics for doctorate-granting institutions, master's-granting institutions, and other selected groups of institutions. Detailed data are available in several publications. *Selected Data on Graduate Students and Postdoctorates in Science and Engineering* (NSF 94-301) includes tables summarizing results on all topics covered by the questionnaire.

Because of the large number of tables (more than 650 in 1992) generated on the basis of graduate S&E enrollment data, it is not feasible to include the full set of tables in a general-audience publication. To meet the needs of those interested in more detailed data of a specific type, NSF has developed a series of "Supplementary Data Releases" focusing on specific data topics. The 18 pamphlets available are listed on the order blank provided at the back of this book.

Tables in these publications showing data for doctorate-granting institutions include all institutions with any school (medical school, dental school, etc.) or branch campus that granted S&E doctorates for all years in which such degrees were offered. This definition differs from that used by the National Center for Education Statistics (NCES), which considers only those institutions that granted "significant numbers" of doctoral degrees to be doctorate-granting institutions.

DATA LIMITATIONS

In any analysis of the data in these publications, the following definitions and limitations should be kept in mind.

- In fall 1992 the definitions of foreign students and U.S. citizens were modified to match those used by the Department of Education's National Center for Education Statistics (NCES) and the Institute of International Education. In previous years permanent residents were counted with foreign students, but in fall 1992 permanent residents were included with U.S. citizens.

- In tables showing full-time graduate enrollment by source of support, "institutional support" includes those students receiving their primary support from State and local government sources as well as from their institutions.

- "Other U.S. sources" includes students supported by industrial firms, nonprofit institutions (independent research institutes, professional societies, philanthropic foundations, etc.), and all other sources of support originating within the United States. However, "Other U.S. sources" does not include loans, family money, or personal savings used by students supporting themselves. Students supported primarily by foreign industrial firms, as well as by foreign governments, are reported under "foreign sources."

- "Imputation," as defined by NSF, denotes a computerized process that estimates data for

totally or partially nonrespondent institutions based on their own data from earlier years, if available, or data from peer institutions. Data can be imputed for an entire institution, a department, or individual cells for which the institution or department was unable to provide actual data. The imputation procedures are described in detail in section II, "Technical Notes."

- Respondent institutions can revise prior-year data as well as current data during the editing process. **Consequently, only the trend data from the current report should be used in historical analyses.**

Data Availability

Data published in these reports are also available on diskettes and in machine-readable form on magnetic tapes. Single-year or multiyear data tapes are available with data for fall 1975 through fall 1992. Information on tape formats and the years for which they are available, together with prices and instructions for ordering, can be found in the current data user guide, *Guide to the Data Files from the National Science Foundation's Annual Surveys of Academic Science and Engineering*. To obtain a copy of the guide, contact Dr. J.G. Huckenpöhler, who can also supply further information on the Survey of Graduate Students and Postdoctorates in Science and Engineering. His address and telephone number are—

E-mail: jhuckenp@nsf.gov

Selected data items for individual doctorate-granting institutions are available on computer-generated institutional profiles. These profiles cover data from this survey as well as data collected in NSF's other academic S&E surveys covering research and development (R&D) expenditures and Federal support to academic institutions. Institutional profiles for any institution or group of institutions can be ordered by FICE code (listed in section III) through Mr. Richard Bennof. He can be reached at—

E-mail: rbennof@nsf.gov

Institutional planners can now obtain data from several academic S&E resources on CD-ROM compact disc. The compact disk contains the Computer Aided Science Policy Analysis and Research (CASPAR) database system, which is an easy-to-use tool for the retrieval and analysis of statistical data on academic science and engineering resources. CASPAR provides an extensive and growing data library with multiyear statistics on the state of higher education in general and on academic S&E resources specifically. This data library is based on a set of standard institutional and field-of-science definitions across the multiple sources used to develop the database. The CASPAR program includes built-in help capabilities to facilitate the use and interpretation of the data.

CASPAR data are drawn from a number of sources. All data are available for individual institutions, by State, and at the national level. Longitudinal data from surveys of universities and colleges conducted by the NSF Division of Science Resources Studies include the R&D Expenditures Survey and the Federal Support Survey besides the Graduate Student Survey. Data from the surveys of universities and colleges conducted by NCES include Earned Degrees, Opening Fall Enrollment, Faculty Salaries, Tenure and Fringe Benefits, and Financial Statistics. Data from other sources include the National Research Council Doctorate Program Ratings. For additional information on CASPAR, contact—

Bethesda, MD 20814

Data Summary

- In fall 1992 495,397 graduate students were enrolled in master's and doctoral programs in the science, engineering, and health fields. This total represents a 4-percent increase from the fall 1991 figure. The increase was 3 percent in the engineering fields and 4 percent in the science fields.

- Of all science fields social science students and Earth, atmospheric, and ocean science students increased the most rapidly (almost 6 percent each). Growth was slowest in the agricultural sciences, with an increase of slightly more than 1 percent. The social sciences continued to be the most popular field in the sciences, with 85,824 graduate students or more than one-fourth of the total. Nearly one-third of the engineering graduate students, 36,272, were enrolled in electrical engineering.

- Graduate students enrolled full-time numbered 323,399 and accounted for 65 percent of the total. The number of graduate students enrolled full-time increased at a faster rate from 1991 to 1992 than did those enrolled part-time (almost 5 percent compared with 3 percent).

- The number of women enrolled in graduate S&E programs continued to rise more rapidly than the number of men, reaching 40 percent of the total. Women increased by 6 percent, whereas men increased by a little less than 3 percent. Women continued to make up the majority of those enrolled in psychology and the health fields but accounted for only 14.5 percent of engineering graduate students.

- Foreign students, at almost 23 percent of the total, increased by less than 1 percent, probably due to a change in the definition of foreign students. In previous years permanent residents were counted with foreign students, but beginning in fall 1992 permanent residents were included with U.S. citizens to conform to data collected by other sources. This definitional shift may explain why students with U.S. citizenship increased by more than 5 percent in 1992 but increased by only 3 percent in 1991. Foreign students were most heavily concentrated in the physical sciences and in engineering, making up almost 36 percent and 35 percent of the total, respectively. Foreign students also made up about one-third of all graduate students in the mathematical sciences and computer sciences.

- At almost 40 percent of the full-time total, academic institutions remained the major source of support for full-time graduate students. Self-supported students (including those supported by loans, family money, or personal savings) made up a little more than 31 percent of the full-time total. The Federal Government supported slightly more than 20 percent.

- Enrollment in doctorate-granting institutions, at 427,792, represented 86 percent of all graduate students. This percentage has varied only slightly since 1975. Nevertheless, master's-granting institutions accounted for more than one-eighth of all graduate students reported and grew by 5 percent from fall 1991 to fall 1992, compared with a 4-percent growth in enrollment at doctorate-granting institutions.

SECTION II. TECHNICAL NOTES

THE SURVEY UNIVERSE

The data collected in the fall 1992 Survey of Graduate Students and Postdoctorates in Science and Engineering (GSPSE) represent national estimates of graduate enrollment and postdoctoral employment at the beginning of academic year 1992–93 in all academic institutions in the United States that granted doctorate or master's degrees in any science or engineering field. Included are data for all branch campuses, affiliated research centers, and separately organized components such as medical or dental schools, schools of nursing, public health, etc. The survey universe consisted of 727 reporting units at 608 graduate institutions. Included were 275 master's-granting institutions and 452 reporting units associated with 333 doctorate-granting institutions.

The National Science Foundation has collected data on graduate science and engineering (S&E) enrollment and postdoctoral appointees since 1966. From fall 1966 through fall 1971, data from a limited number of doctorate-granting institutions were collected through the NSF Graduate Traineeship Program, which requested data only on those S&E fields supported by NSF. Beginning with the fall 1972 survey, this data collection effort was assigned to the Universities and Nonprofit Institutions Studies Group and was gradually expanded during the period 1972–75 to include additional S&E fields as well as all institutions known to have programs leading to the master's or doctorate degree. Because of this expansion, data for 1974 and earlier years are not strictly comparable with 1975 and later data. Table II-1 shows the number of institutions, reporting units, and departments at each level included in the data, as well as the total enrollment reported for each year between 1966 and 1992. No attempt has been made to inflate the data for 1966–74 to reflect universe totals.

Beginning with the 1984–85 academic year, master's-granting institutions were surveyed on a sample basis. The fall 1988 survey included the entire survey population for the first time since 1983–84. For each year since 1988, any institutions that begin S&E master's or doctoral programs are added to the survey universe and any that close all their S&E graduate programs are deleted. (See "Survey Methodology," below.)

Tables II-2 and II-3 present data on departmental coverage by S&E field for doctorate-granting and master's-granting institutions for each year in the survey.

THE SURVEY INSTRUMENTS

The Departmental or Program Data Sheet (NSF Form 812) on which data were reported in fall 1992 was identical to the fall 1991 version, except for changes in the instructions to clarify some data items, most notably the definitions of postdoctoral appointees; first-year, full-time graduate students; and sources of support for full-time students. Furthermore, in fall 1992 the definitions of foreign students and U.S. citizens were modified to match those used by the Department of Education's National Center for Education Statistics (NCES) and the Institute of International Education. In previous years permanent residents were counted with foreign students, but in fall 1992 permanent residents were included with U.S. citizens.

Each survey package also included (1) a flier explaining NSF's academic S&E surveys; (2) a computer-generated List of Departments or Programs (NSF Form 811) specific to each institution surveyed and based on the departments known to exist in the previous survey cycle; (3) a "crosswalk" showing NCES instructional program codes corresponding to each S&E field as defined by NSF; (4) a "How To Avoid Common Survey Errors" sheet with guidelines for avoiding the most common mistakes made in the Graduate Student Survey; and (5) a postcard acknowledging receipt of the survey and requesting the respondent to indicate changes in coordinator name, address, or telephone number.

SURVEY METHODOLOGY

The survey packages were mailed out by Nov. 12, 1992. The final survey universe consisted of 727 responding units at 608 institutions.

The acknowledgment postcard requested that institutional coordinators indicate how the data were collected, whether the data were maintained centrally or collected from individual departments, and whether they were derived from a computerized database or

were hand tabulated. Of the 727 responding schools surveyed, coordinators at 697 units, or 96 percent, have provided this information over the past 6 years. The responding coordinators indicated the following distribution of data sources:

Schools reporting data sources	N = 697	Percent = 95.9
Computerized central records	76	10.5
Automated with departmental input	18	2.5
Hand-tabulated at the institutional level	49	6.7
Hand-tabulated at the departmental level	192	26.4
Combination of sources	362	49.8

This pattern is similar to that for 1991. This year the number of schools using computerized systems to assemble the requested data increased as did those using automated systems with departmental input and those hand tabulating data at the department level. The number of schools hand tabulating data at the institution level remained relatively the same as last year, whereas those using a combination of data sources decreased.

Institutional coordinators were asked to review the departmental listing provided on the Form 811, to indicate any changes in their departmental structure such as departments newly formed, phased out, split, or merged, and to check off any departments that had neither graduate students nor postdoctorates and for which Form 812s would therefore not be submitted. The revised Form 811s were returned to the data processing contractor for use as a checklist in tracking departmental responses.

A Form 812 was completed for each department either centrally or at the departmental level and was returned to the data processing contractor for data entry, editing, and tabulation. Arithmetic errors, inconsistencies between items, and sharp year-to-year fluctuations were referred to the institutional coordinators for correction or clarification.

The Response Rate

Of the 727 responding units included in the fall 1992 survey, 726, or 99.9 percent, were able to provide at least partial data, distributed as follows:

Highest degree granted	Number surveyed	Number responding	Percentage responding
Doctorate and master's	727	726	99.9
Doctorate	452	451	99.8
Master's	275	275	100.0

At the departmental level 10,604 departments responded, or 97.0 percent of the 10,936 departments surveyed. This includes 9,066 departments providing complete responses, or 82.9 percent of the total. A total of 332 departments, or 3.0 percent of the departmental total, required complete imputation, and 1,538, or 14.1 percent, had one or more data cells imputed. Table II-4 presents the response rates for earlier years for comparison.

Missing data for partially nonrespondent departments were imputed using the departments' previous year's data, where available, or data from peer institutions in cases where data had not been reported the previous year. Data for nonrespondent departments (departments that did not provide any data) were imputed using data from the previous year, where available. For the two nonrespondent departments that were new to the survey, data could not be imputed. The number of departments in doctorate-granting and master's-granting institutions that required total or partial imputation and the numbers and proportions of full-time and part-time graduate students and postdoctorates imputed are shown in tables II-5 through II-8. In 1992 imputation rates for graduate students in master's-granting institutions were slightly higher than for those in doctorate-granting institutions.

Changes in Data Items

Although NSF has attempted to maintain consistent trend data, some modifications in the survey questionnaire have been made to respond to changing issues over the past 15 years. As a result some data items are not available for all institutions in all years.

Whenever a new item has been added to the questionnaire, it has been NSF's standard policy to allow the respondents 1 year's leadtime to convert their data collection systems before incorporating the new data into the survey; the question is labeled

"optional" in the first year. Thus, whereas information on racial/ethnic background was first added to the survey form in 1979, publishable data were first obtained in 1980. Major changes in the data collected are as follows:

- From 1975 through 1977, data for master's-granting institutions were collected on a short form (i.e., an abbreviated form of the survey) that did not collect data on sex or citizenship of graduate students, nor any data on postdoctoral appointees. In 1978 a similar questionnaire was sent to doctorate-granting institutions, but master's-granting institutions were not surveyed. The 1978 figures shown in the tables for master's-granting institutions represent estimates based on 1977 and 1979 data. Beginning in 1979 the long form (i.e., the full-scale survey form) was sent to both doctorate-granting and master's-granting institutions.

- Distribution by sex was originally requested only for full-time graduate students at doctorate-granting institutions. Beginning in 1976 master's-granting institutions were requested to provide data on all graduate students by sex, and in 1977 similar data were requested for all graduate students in all institutions. The short form used in the 1978 survey did not request any information on sex; figures in the tables represent estimates based on 1977 and 1979 data.

- Citizenship data were collected only for graduate students enrolled full-time in doctorate-granting institutions through 1977. No citizenship data were requested on the short form used for master's-granting institutions in 1975 through 1977 and for doctorate-granting institutions in 1978. Data on citizenship of all full-time graduate students are available beginning in 1979 and on those enrolled part-time since 1983.

- As noted above, racial/ethnic data were first requested in 1979 and became a standard item on the questionnaire in 1980. However, imputation rates for this item are still higher than for other data on the questionnaire, as shown in tables II-6 and II-8.

- "Fellowships and traineeships" were combined on one line until 1979, when separate data on the two mechanisms were first collected.

- "Other nonfaculty research staff with doctorates" were combined with postdoctoral appointees until 1979.

- Separate data on students receiving their primary support from the U.S. Department of Agriculture were first requested in 1985.

Data Revisions

During the fall 1988 survey cycle, the criteria for including departments in the survey universe were tightened, and all departments surveyed were reviewed. Those departments not primarily oriented toward granting research degrees were no longer considered to meet the definition of science and engineering. As a result of this review, it was determined that a number of departments, primarily in the field of "Social sciences, n.e.c." (not elsewhere classified), were engaged in training primarily teachers, practitioners, administrators, or managers rather than researchers; these departments were deleted from the database. This process was continued during the fall 1989, 1990, 1991, and 1992 survey cycles and expanded to ensure trend consistency for the entire 1975–92 period. As a result, total enrollments and social science enrollments for all years were reduced. The net effect of adjustments over the years is shown in table II-9.

The definition of "medical schools" was revised during the fall 1992 survey cycle to include only those institutional components that are members of the Association of American Medical Colleges. Tables generated after the fall 1992 survey differ from their counterparts in earlier years in that they exclude schools of nursing, public health, dentistry, veterinary medicine, and other health-related disciplines, and should not be compared with tables from earlier years.

1/ The name of the survey was changed in 1981 to specify the inclusion of engineering.

2/ The 1972 survey of doctorate-granting institutions included selected data items for 1971.

3/ The 1976 survey of master's-granting institutions included selected data items for 1975.

4/ The 1978 survey did not include master's institutions. Two institutions were subsequently changed from doctorate- to master's-granting. Totals represent estimates based on 1977 and 1979 data.

5/ Master's-granting institutions were surveyed on a sample basis from 1984 through 1987.

Table II-6. Imputed data for all departments at doctorate-granting institutions: Fall 1992
[No. of departments: 1,419 (totally imputed departments: 280]

ITEM 5 NUMBER OF **FULL-TIME** GRADUATE STUDENTS enrolled for advanced degrees (master's and doctorate) in fall 1992. Report each student **only once** according to the source and mechanism of the **largest amount of support** received in fall 1992.

Students receiving equal support from multiple sources or through multiple mechanisms should be reported only once. When determining the largest source of support, consider **all** graduate school expenses including tuition, tuition remission, other academic expenses, stipends, and living expenses.

MECHANISMS OF SUPPORT	Line No.	STUDENTS RECEIVING FINANCIAL ASSISTANCE: FEDERAL SOURCES (excluding loans): Department of Defense (A)	HHS: National Institutes of Health (B)	HHS: Other HHS (C)	National Science Foundation (D)	Department of Agriculture (E)	Other Federal sources (F)	NON-FEDERAL SOURCES: Institutional support (including State and local government) (G)	Foreign sources (H)	Other U.S. sources (I)	SELF-SUPPORTED STUDENTS (including loans and family sources) (J)	**TOTAL FULL-TIME GRADUATE ENROLLMENT** (Sum of (A) through (J)) (K)

1/ The 1976 survey also collected 1975 data from master's-granting institutions.

2/ Master's-granting institutions were not surveyed in 1978.

3/ Includes estimated data for master's-granting institutions, which were surveyed on a sample basis from 1984 through 1987. See Technical Notes for further information.

SECTION III. LIST OF INSTITUTIONS INCLUDED IN THE FALL 1992 SURVEY

The graduate institutions included in the 1992 survey are listed in alphabetical order by State in tables III-1 and III-2. Table III-1 lists all doctorate-granting institutions in the universe and their separately reported components, with their institutional codes as assigned by the Federal Interagency Committee on Education (FICE). Table III-2 contains the same information for all master's-granting institutions in the survey universe. Institutional FICE codes are provided for the convenience of those wishing to request institutional profiles (see "General Notes," page 1), for their own or selected peer institutions. These profiles are available only at the institutional level, however; separate profiles are not available for individual components or branch campuses within an institution.

OCTOBER 1992

NATIONAL SCIENCE FOUNDATION AND NATIONAL INSTITUTES OF HEALTH
SURVEY OF GRADUATE STUDENTS AND POSTDOCTORATES IN SCIENCE AND ENGINEERING, FALL 1992

FORM APPROVED
OMB NO. 3145-0062
APPR. EXP. 11/1/96

INSTRUCTIONS FOR SURVEY COORDINATOR

INSTITUTION: 001083-0 University of Arizona
Graduate School

1. Please review the list of departments/programs printed on the following pages. Add any newly formed graduate science or engineering (S&E) departments or programs in the spaces provided at the end of the list and note any name changes or reorganizations where they occur. Because of special interest at NSF and NIH, please separate the following: computer science from mathematics; all engineering fields by discipline (electrical, mechanical, etc.); and clinical psychology from all other psychology programs. Please submit separate survey Forms 812 for each such program.

2. Please cross out discontinued or non-S&E programs on the departmental/program list, and indicate the last year that each discontinued program had students. However, programs which do not have graduate students or postdoctorates in Fall 1992 but may have them in the future, should NOT be crossed out; place a check in column (6) of the list instead of submitting a Form 812 for such departments/programs.

3. The enclosed Crosswalk shows the 3-digit NSF code and comparable NCES discipline codes for each science and engineering field. Please review the first 3 digits of the codes in column (2) of your list to verify that each department/program has been assigned to the correct discipline. If you do not agree with the code in column (2), please note the Crosswalk's discipline code that most closely corresponds to your department/program.

4. (a) In MEDICAL SCHOOLS, departments/programs followed by a single asterisk (*) include the indented sections/specialties listed beneath them. These sections/specialties may be without organizational autonomy; however, because of special interest at NIH, please submit separate data for each section/specialty. In addition, please make sure that no duplicate data are reported for sections/specialties and their parent programs. (b) In GRADUATE SCHOOLS, departments followed by an asterisk (*) include the indented specific degree-programs listed beneath them. Please submit separate Forms 812 for each specific degree-program.

5. Please distribute the enclosed Forms 812 as soon as possible to all listed and newly formed departments/programs if data cannot be obtained from your centralized files. The Forms 812 provide instructions and definitions for all requested data items. Please follow these guidelines when completing the Forms 812 (survey questionnaires).

6. Please review the Forms 812 for completeness and consistency, and verify or supply the highest degree offered by each department/program. Please check this year's data against the previous year's data shown on the departmental/program list and indicate the validity of any large year-to-year changes in the "Comments" section below or on the individual Forms 812.

7. Please do NOT submit responses for any graduate departments in education, law, humanities, music, the arts, physical education, library sciences, and all other non-S&E fields.

8. Please return one copy of the Form 811 (this form) along with all completed Forms 812 by JANUARY 31, 1993 to:

   National Science Foundation
   Division of Science Resources Studies
   Suite 965
   4201 Wilson Boulevard
   Arlington, VA 22230

   Please keep a copy of the Form 811 and the Forms 812 for your records.

9. Care should be taken to submit as complete and as accurate a report as possible in order to minimize follow-up procedures and to make more timely statistics available. If you have any questions concerning your response, please call Dr. J. G. Huckenpahler at the National Science Foundation's, Division of Science Resources Studies at (703) 306-1774.

LIST OF SURVEY COORDINATORS

INSTITUTION: 001083-0 University of Arizona
Graduate School

For your information, all GRADUATE STUDENT SURVEY COORDINATORS on record at your institution are listed below.

To avoid duplicate reporting of departments or programs, please be sure that joint departments or programs have been counted in only one school. In cases where you believe there may be a joint department or program between a graduate and medical school, the Form 812 should be completed by the medical school and the department should be recorded on the medical school's form 811. Please confirm this with the other coordinators, if necessary.

Please check with the other survey coordinators that each eligible department in your institution has been covered by one of the coordinators listed below.

001083-5
NAME: Christopher A. Leadem, Ph.D.
TITLE: Associate Dean, Student Affairs
ADDRESS: University of Arizona
College of Medicine
1501 N Campbell Ave
Tucson, Arizona 85724
TELEPHONE: (602) 626-6216

INSTRUCTIONS

FOR THE NSF SURVEY OF GRADUATE STUDENTS AND POSTDOCTORATES IN SCIENCE AND ENGINEERING, FALL 1992

PURPOSE OF THE SURVEY

The survey provides a comprehensive picture of the training of future scientists and engineers in the Nation's graduate schools. Data are used by Congress and the executive branch during budget preparation, and by State government agencies and other analysts to assess the future supply of science and engineering (S&E) personnel.

This information is solicited under the authority of the National Science Foundation Act of 1950, as amended. All information provided will be used for statistical purposes only. Response is entirely voluntary and failure to provide some or all of the information will in no way adversely affect your institution.

The average time required for questionnaire completion is two hours. Response burden comments should be directed to Herman Fleming at NSF, (202) 357-9520.

Students included in this survey

Count as graduate students persons enrolled **for credit** in any S&E master's or Ph.D. degree program in fall 1992. Report M.D., D.O., D.V.M., or D.D.S. candidates, interns, and residents in items 5 through 7 **only** if they are concurrently working for an S&E master's or Ph.D. or are enrolled in a joint medical/Ph.D. program. Individuals who already hold graduate or medical degrees and are working on another master's or Ph.D. degree are considered graduate students (Items 5 through 7), not postdoctorates (Item 8).

Include S&E students performing thesis or dissertation research away from the campus (for example, at Government- and contractor-owned facilities) in the United States as long as they are enrolled for credit in an advanced-degree program.

All data should be reported in terms of headcounts, not full-time equivalents (FTEs).

Students excluded from this survey

Exclude students enrolled in a foreign country (at a branch or extension center), as well as non-matriculated students.

Students enrolled in multiple departments/institutions

A student should be reported in only **one** department. Students enrolled in interdisciplinary/interinstitutional programs should be counted only once, by their "home" department and institution.

INCOMPLETE DATA

Please write "unavailable" or "unknown" in data cells as applicable. On this form, "N/A" means "not applicable." Data cells left blank are presumed to be zeroes.

ITEM 5: FULL-TIME STUDENTS

Report the total number of full-time degree-seeking students in line 6(K). Then, in lines 1-6, count each full-time student **only once** by **largest** source of support so that all columns and rows in Item 5 sum to the full-time total in line 6(K). In Item 5, count only graduate students pursuing an S&E degree according to a full-time schedule; this may include any combination of study, teaching, and research, depending on your institution's policy and definition of full-time status. For example, many institutions base full-time status on the number of credit hours taken; others calculate full-time according to the amount of fees paid by the student.

Mechanisms of Support – Lines (1) through (5)

A **fellowship,** line (1), is any competitive award (often from a national competition) made to a student which requires no work of the recipient. A **traineeship,** line (2), is an educational award given to a student selected by the university. An **assistantship** should be classified as **research,** line (3), or **teaching,** line (4), depending on assigned duties; e.g., a student devoting most of his/her time to teaching should be reported on line (4). All other full-time students, including members of the armed forces whose tuition is paid by the Department of Defense, and self-supported students, should be reported on line (5).

Federal sources of support – Columns (A) through (F)

Department of Defense (DOD) – Column (A): Sources include the Departments of the Army, Navy, or Air Force, as well as programs within the Office of the Secretary of Defense. Students receiving their main support from the Veterans Administration under the G.I. Bill should be reported under column (F), "Other Federal sources."

Department of Health and Human Services (HHS) – Columns (B) and (C): Report students with support from the institutes or divisions of the National Institutes of Health (NIH) under column (B); support from all other components of HHS should be reported in column (C). Refer to the organizational roster under "Definitions."

National Science Foundation (NSF) – Column (D): Report students receiving NSF graduate fellowships and minority fellowships, as well as those supported under NSF research grants.

U.S. Department of Agriculture (USDA) – Column (E): Include research assistants working on projects financed out of Hatch, McIntyre-Stennis, or Smith-Lever formula funds, competitive research grants, and institution fellowship/training grants.

Other Federal Sources – Column (F): Report students receiving support from Federal agencies other than those listed in columns (A) through (E), such as the Fulbright program, the G.I. Bill, Department of Education, and Department of Energy programs. Students primarily supported by Federal loans should be reported in column (J): self-supported students.

Non-Federal Sources of Support – Columns (G) through (I)

Institutional support – Column (G): Report students supported from YOUR institution, including those receiving tuition waivers. State and local government support should also be reported in this column. Students primarily supported with funds from the Federal government, such as training grants, however, should be reported under the appropriate Federal agency.

Foreign sources – Column (H): Report students supported from any non-U.S. source, such as foreign governments, industrial firms, or specialized agencies of the United Nations.

Other U.S. sources – Column (I): Report students supported from nonprofit institutions, private industry, and all other non-Federal U.S. sources not included in columns (G) or (J).

Self-supported students – (Column J): Report both foreign and U.S. citizen students whose largest source of support comes from ANY loans (including Federal loans) or from personal or family financial contributions. **These students must be included in the full-time total, line 6(K).**

Women – Line (7)

Report all female students by the source of their primary support. In each column, data on line (7) should not exceed the total on line (6).

First-year students – Lines (8) and (9)

A first-year student has enrolled for the first time in the program in which he/she is pursuing a degree as of the beginning of the fall term in 1992. All other students should be considered to be beyond their first year.

ITEM 6: PART-TIME STUDENTS

Report all part-time students in Item 6, regardless of their source of support. Part-time students are pursuing an S&E graduate degree but NOT on a full-time schedule. Consider students part-time according to your own institution's definition of part-time status.

ITEM 7: CITIZENSHIP AND RACIAL/ETHNIC BACKGROUND OF U.S. CITIZENS

Report all U.S. citizens and permanent residents in columns (A) through (F), and count each student only once according to his/her racial/ethnic category as defined by the Bureau of the Census, listed under "Definitions."

Count foreign students, i.e., those holding temporary visas, only **once** in column (G), regardless of race/ethnicity. Native residents of a U.S. possession and applicants for U.S. citizenship holding green cards, however, should be reported as U.S. citizens.

Total full- and part-time enrollments reported in Item 7 should match those reported in Items 5 and 6, respectively.

ITEM 8: POSTDOCTORATES AND NONFACULTY RESEARCH STAFF WITH DOCTORATES

Postdoctorates – Columns (A) through (F): Include individuals with S&E Ph.D.'s, M.D.'s, D.D.S.'s or D.V.M.'s (including foreign degrees equivalent to U.S. doctorates) who devote their **primary effort to their own research training through research activities or study** in the department under temporary appointments carrying no academic rank. These individuals may contribute to the academic program through seminars, lectures, or working with graduate students. Such postdoctorates may have different titles at different institutions, e.g., "Postdoctoral Scholar," "Research Associate," "Postdoctoral Fellow," or "Postgraduate Researcher." Exclude, however, clinical fellows and those with appointments in residency training programs in medical and health professions, **unless research training under the supervision of a senior mentor is the primary purpose** of the appointment.

Report postdoctorates by source of support in columns (A) through (D), with the total number of postdoctorates reported in column (E). Of this total, report the number who are foreign in column (F).

Other non-faculty research staff with doctorates – Column (G): Include all doctoral scientists and engineers who are involved principally in research activities but are not considered either postdoctoral appointees or members of the regular faculty.

On line (2), report the number of women in each category. On line (3), report those postdoctorates and nonfaculty research staff who hold first professional medical degrees (M.D., D.D.S., D.O., D.V.M.). Please note that in each column, data on lines (2) and (3) should not exceed the total on line (1).

DEFINITIONS

- **National Institutes of Health Organizational Roster** Item 5, column (B)

  National Institute on Aging
  National Institute on Allergy and Infectious Disease
  National Institute of Arthritis and Musculoskeletal and Skin Diseases
  National Cancer Institute
  National Institute of Child Health and Human Development
  National Institute on Deafness and Other Communication Disorders
  National Institute of Dental Research
  National Institute of Diabetes and Digestive and Kidney Diseases
  National Institute of Environmental Health Sciences
  National Eye Institute
  National Institute of General Medical Sciences
  National Heart, Lung and Blood Institute
  National Institute of Neurological Disorders and Stroke
  National Library of Medicine
  National Center for Human Genome Research
  National Center for Nursing Research
  National Center for Research Resources
  Fogarty International Center

- **Other HHS Administrative Units** Item 5, column (C)

  Alcohol, Drug Abuse and Mental Health Administration
    National Institute on Alcohol Abuse and Alcoholism
    National Institute on Drug Abuse
    National Institute of Mental Health
  Centers for Disease Control
    National Institute for Occupational Safety and Health
  Food and Drug Administration
  Health Resources and Services Administration
  Office of Human Development

- **Racial/Ethnic Categories for U.S. Citizens defined by the Bureau of the Census** (Item 7)

  Black, non-Hispanic: Persons having origins in any of the black racial groups (except those of Hispanic origin).

  American Indian or Alaskan native: Persons having origins in any of the original peoples of North America.

  Asian or Pacific Islander: Persons having origins in any of the original peoples of the Far East, Southeast Asia, the Indian subcontinent, or the Pacific Islands. These areas include China, Japan, Korea, the Philippine Islands, and Samoa.

  Hispanic: Persons of Mexican, Puerto Rican, Cuban, Central or South American, or other Spanish culture or origin, regardless of race.

  White, non-Hispanic: Persons having origins in any of the original peoples of Europe, North Africa, or the Middle East, except those of Hispanic origin.

FOR FURTHER INFORMATION . . .

If you have any questions about the survey, please contact Pamela Krones of Quantum Research Corporation at (301) 657-3070 [fax (301) 657-3862].

UPON COMPLETING THIS FORM, PLEASE RETURN IT TO YOUR SURVEY COORDINATOR FOR TRANSMITTAL BY JANUARY 31, 1993.

NSF Form 812 Oct '92

NATIONAL SCIENCE FOUNDATION and NATIONAL INSTITUTES OF HEALTH

Survey of Graduate Students and Postdoctorates in Science and Engineering, Fall 1992

Form approved
OMB No. 3145-0062
Appr Exp 8/31/93

DEPARTMENT OR PROGRAM DATA SHEET

Due date: January 29, 1993

ITEMS 1-4 **IDENTIFYING INFORMATION**

1 Institution Name _____

2 Name of S&E department or program _____

If changed since last year, please indicate previous name and whether this represents a merger, split, or expanded program _____

3 Person in department (or program) preparing this form

Name _____

Title _____

Phone ( ) _____

4 Highest **graduate** degree available in this department or program (CHECK ONE) (1) Doctorate _____ (2) Master's _____ (3) No Graduate Degree Offered

Institution and department code (LEAVE BLANK)

Report all data on a headcount basis (use whole numbers, *not* fractions, decimals, FTEs, etc.). If your department does not enroll graduate students, please go to item 8.

ITEM 5 NUMBER OF **FULL-TIME** GRADUATE STUDENTS enrolled for advanced degrees (master's and doctorate) in fall 1992. Report each student **only once** according to the source and mechanism of the **largest amount of support** received in fall 1992.

Students receiving equal support from multiple sources or through multiple mechanisms should be reported only once. When determining the largest source of support, consider **all** graduate school expenses including tuition, tuition remission, other academic expenses, stipends, and living expenses.

MECHANISMS OF SUPPORT	Line No.	STUDENTS RECEIVING FINANCIAL ASSISTANCE: FEDERAL SOURCES (excluding loans): Department of Defense (A)	HHS: National Institutes of Health (B)	HHS: Other HHS (C)	National Science Foundation (D)	Department of Agriculture (E)	Other Federal sources (F)	NON FEDERAL SOURCES: Institutional support (including State and local government) (G)	Foreign sources (H)	Other U.S. sources (I)	SELF-SUPPORTED STUDENTS (including loans and family sources) (J)	TOTAL FULL-TIME GRADUATE ENROLLMENT (Sum of (A) through (J)) (K)
Graduate Fellowships	(1)											
Graduate Traineeships	(2)											
Graduate Research Assistantships	(3)											
Graduate Teaching Assistantships	(4)											
Other Types of Support	(5)											
FULL-TIME TOTAL*	(6)											
Of the students in line (6), how many in each data cell are WOMEN?	(7)											

FIRST-YEAR STUDENTS	(8)	Of the students on line (6), column (K), how many are FIRST-YEAR students? (Should not exceed total on line (6))	
FIRST-YEAR WOMEN STUDENTS	(9)	Of the first-year students on line (8), how many are WOMEN?	

* The total from line (6) should be inserted in item (7), line (1), column (H).

ITEM 6 NUMBER OF **PART-TIME** GRADUATE STUDENTS enrolled for advanced degrees (master's and doctorate) in fall 1992		
PART-TIME TOTAL*	(1)	
Of the students on line (1), how many are WOMEN?	(2)	

* The total from line (1) should be inserted in item (7), line (2), column (H)

ITEM 7 **RACE/ETHNICITY** OF FULL-TIME (line (1)) and PART-TIME (line (2)) graduate students in fall 1992	Of the student totals in items 5 and 6, how many belong to the following RACIAL/ETHNIC categories? **Be sure to count each student only once.**		U.S. CITIZENS AND PERMANENT RESIDENTS						FOREIGN temporary visa holders (G)	**TOTAL** (Sum of (A) through (G)) (H)
			Black non-Hispanic (A)	Amer. Indian/ Alaskan Native (B)	Asian/ Pacific Islander (C)	Hispanic (D)	White non-Hispanic (E)	Other, unknown or declined to state (F)		
	FULL-TIME, column (H), should equal item 5, line (6), column (K)	(1)								
	PART-TIME, column (H), should equal item 6, line (1)	(2)								

ITEM 8 NUMBER OF **POSTDOCTORATES AND NON-FACULTY RESEARCH STAFF WITH DOCTORATES** in fall 1992		POSTDOCTORATES						OTHER NON-FACULTY RESEARCH STAFF WITH DOCTORATES (G)
		SOURCE OF SUPPORT				TOTAL for all sources (A) through (D) (E)	Of the total in (E), how many are FOREIGN? (F)	
		Federal			Non-Federal (D)			
		Fellowships (A)	Traineeships (B)	Research grants (C)				
TOTAL	(1)							
Of the total in each cell of line (1), how many are WOMEN?	(2)							
Of the total in each cell of line (1), how many hold the M.D., D.O., D.D.S., or D.V.M. degree?	(3)							

Approximately how many personhours were required to complete this form?

Explain variances from prior year's data or include other comments.

List other Federal sources (agencies) from item 5, column (F), and number of full-time students supported by each.

This questionnaire has been printed on recycled paper.

Survey of Graduate Students and Postdoctorates in Science and Engineering

CROSSWALK BETWEEN NSF DISCIPLINE CODES AND THE NCES CLASSIFICATION OF INSTRUCTIONAL PROGRAMS

The following set of discipline codes is used to categorize science and engineering departments in the Survey of Graduate Students and Postdoctorates in Science and Engineering. Representative department names are shown under each of the discipline codes.

ENGINEERING

101 AEROSPACE ENGINEERING
- 14.02 AEROSPACE, AERONAUTICAL, AND ASTRONAUTICAL ENGINEERING

102 AGRICULTURAL ENGINEERING
- 14.03 AGRICULTURAL ENGINEERING

103 BIOMEDICAL ENGINEERING
- 14.05 BIOENGINEERING AND BIOMEDICAL ENGINEERING

104 CHEMICAL AND RELATED ENGINEERING
- 03.0509 WOOD SCIENCE
- 14.07 CHEMICAL ENGINEERING
- 14.32 POLYMER/PLASTICS ENGINEERING

105 CIVIL AND RELATED ENGINEERING
- 04.02 ARCHITECTURE
- 14.04 ARCHITECTURAL ENGINEERING
- 14.08 CIVIL ENGINEERING
- 14.0803 STRUCTURAL ENGINEERING
- 14.0805 WATER RESOURCES ENGINEERING
- 14.14 ENVIRONMENTAL/ENVIRONMENTAL HEALTH ENGINEERING

106 ELECTRICAL AND RELATED ENGINEERING
- 14.09 COMPUTER ENGINEERING
- 14.10 ELECTRICAL, ELECTRONICS, AND COMMUNICATIONS ENGINEERING

107 ENGINEERING SCIENCE AND ENGINEERING PHYSICS
- 14.12 ENGINEERING PHYSICS
- 14.13 ENGINEERING SCIENCE

108 INDUSTRIAL/MANUFACTURING ENGINEERING
- 14.17 INDUSTRIAL/MANUFACTURING ENGINEERING
- 14.27 SYSTEMS ENGINEERING
- 14.30 ENGINEERING/INDUSTRIAL MANAGEMENT
- 30.06 SYSTEMS SCIENCE

109 MECHANICAL AND RELATED ENGINEERING
- 14.11 ENGINEERING MECHANICS
- 14.19 MECHANICAL ENGINEERING

110 METALLURGICAL AND MATERIALS ENGINEERING
- 14.06 CERAMIC SCIENCES AND ENGINEERING
- 14.18 MATERIALS ENGINEERING
- 14.20 METALLURGICAL ENGINEERING
- 14.28 TEXTILE SCIENCES AND ENGINEERING
- 14.31 MATERIALS SCIENCE
- 40.0701 METALLURGY

111 MINING AND RELATED ENGINEERING
- 14.15 GEOLOGICAL ENGINEERING
- 14.16 GEOPHYSICAL ENGINEERING
- 14.21 MINING AND MINERAL ENGINEERING

112 NUCLEAR ENGINEERING
- 14.23 NUCLEAR ENGINEERING

113 PETROLEUM ENGINEERING
- 14.25 PETROLEUM ENGINEERING

114 ENGINEERING, N.E.C.
- 14.01 ENGINEERING, GENERAL
- 14.22 NAVAL ARCHITECTURE AND MARINE ENGINEERING
- 14.24 OCEAN ENGINEERING
- 14.29 ENGINEERING DESIGN
- 14.99 ENGINEERING, OTHER

PHYSICAL SCIENCES

HOW TO AVOID COMMON SURVEY ERRORS

Survey forms requiring mathematical corrections and/or verification for possible data inconsistencies are returned to departments before they are considered final. To avoid common mistakes found on the survey forms, please follow these guidelines:

(1) Use only whole numbers, not decimals or fractions. When reporting graduate students in Items 5, 6, and 7, and postdoctoral appointees in Item 8, use headcounts rather than full-time-equivalents (FTEs).

(2) Count only full-time, degree-seeking graduate students in Item 5, and count each only once, by the largest source of support, so that all columns and rows sum to the full-time total in line 6(K).

(3) Don't forget full-time, self-supported students, who should be reported in Item 5, column (J). Self-supported students are supported primarily through loans, personal savings, and/or family contributions.

(4) Don't forget to report sources of support for all full-time women in Item 5, line 7.

(5) For the purposes of this survey, fellowships are competitive awards which require no work from the recipient. Do not report students in the fellowship row of Item 5 if their largest source of support does not fit this definition.

(6) Report only full-time, first-year students in Item 5, lines 8 and 9. The total number of full-time, first-year students reported in Item 5, line 8 should not be greater than the full-time total reported in Item 5, line 6(K). Likewise, the total number of first-year full-time women reported in Item 5, line 9 should not be greater than the full-time women total reported in Item 5, line 7(K).

(7) Do not report any part-time students in Item 5. Count all part-time students in Items 6 and 7 only.

(8) Be sure the full-time total reported in Item 5, line 6(K) equals the full-time total reported in Item 7, line 1(H). The part-time total reported in Item 6, line 1 should equal the part-time total reported in Item 7, line 2(H).

(9) Count only U.S. citizens and permanent residents in Item 7, columns A-F. Count all foreign students on temporary visas in column (G) only, regardless of race/ethnicity.

(10) For the purposes of this survey, departments or programs that do not offer graduate degrees (Ph.D. or master's) are considered as "no-degree" programs, even if they grant a first professional doctorate. Such "no-degree" programs should not report students, postdoctoral appointees, or anyone else in Items 5, 6, and 7. Count individuals in a "no-degree" program only in Item 8, and only if they qualify as postdoctoral appointees or other non-faculty research staff by this survey's definitions.

(11) Report the total number of postdoctorates in Item 8, line 1(E). Don't forget the total women postdoctorates in Item 8, line 2(E), and total postdoctorates holding M.D., D.D.S., and D.V.M. degrees in Item 8, line 3(E). Of each of these, foreign postdoctorates should also be reported in Item 8, column (F).

(12) If the data for 1992 vary significantly from those provided last year, please note the reasons for the change in the "Comments" section of the survey Form 812.

If you have any questions, please contact Ms. Pamela Krones of Quantum Research Corporation at (301) 657-3070.

TECHNICAL TABLES

Table *Page*

Summaries of selected departmental responses

IV-A-1. Summary of responses from all departments at all graduate institutions: fall 1992 47

IV-A-2. Summary of responses from all science departments at all graduate institutions: fall 1992 48

IV-A-3. Summary of responses from all physical science departments at all graduate institutions: fall 1992 49

IV-A-4. Summary of responses from all Earth, atmospheric, and ocean sciences departments at all graduate institutions: fall 1992 50

IV-A-5. Summary of responses from all mathematical science departments at all graduate institutions: fall 1992 51

IV-A-6. Summary of responses from all computer science departments at all graduate institutions: fall 1992 52

IV-A-7. Summary of responses from all agricultural science departments at all graduate institutions: fall 1992 53

IV-A-8. Summary of responses from all biological science departments at all graduate institutions: fall 1992 54

IV-A-9. Summary of responses from all psychology departments at all graduate institutions: fall 1992 55

IV-A-10. Summary of responses from all social science departments at all graduate institutions: fall 1992 56

IV-A-11. Summary of responses from all engineering departments at all graduate institutions: fall 1992 57

IV-A-12. Summary of responses from all aerospace engineering departments at all graduate institutions: fall 1992 58

IV-A-13. Summary of responses from all chemical engineering departments at all graduate institutions: fall 1992 59

IV-A-14. Summary of responses from all civil engineering departments at all graduate institutions: fall 1992 60

Table *Page*

IV-A-15. Summary of responses from all electrical engineering departments at all graduate institutions: fall 1992 61

IV-A-16. Summary of responses from all industrial engineering departments at all graduate institutions: fall 1992 62

IV-A-17. Summary of responses from all mechanical engineering departments at all graduate institutions: fall 1992 63

IV-A-18. Summary of responses from all metallurgical and materials engineering departments at all graduate institutions: fall 1992 64

IV-A-19. Summary of responses from all other engineering departments at all graduate institutions: fall 1992 65

IV-A-20. Summary of responses from all health fields departments at all graduate institutions: fall 1992 66

IV-B-1. Summary of responses from all departments at doctorate-granting institutions: fall 1992 67

IV-C-1. Summary of responses from all departments at master's-granting institutions: fall 1992 68

IV-D-1. Summary of responses from all departments at all public institutions: fall 1992 69

IV-D-2. Summary of responses from all departments at all private institutions: fall 1992 70

IV-D-3. Summary of responses from all departments at all historically black institutions: fall 1992 71

IV-D-4. Summary of responses from all departments at all land grant institutions: fall 1992 72

IV-D-5. Summary of responses from all departments at all medical schools: fall 1992 73

Table IV-A-1. Summary of responses from all departments at all graduate institutions: fall 1992

SUPPLEMENTARY DATA RELEASES AVAILABLE

In response to the particular interests expressed by many users of data from the Survey of Graduate Students and Postdoctorates in Science and Engineering, a number of pamphlets have been prepared that concentrate on various aspects of the survey results. If you would like to receive additional pamphlets, please check the appropriate boxes below, fill out order form, cut on dotted line, fold in half, tape, and drop in the mail. No postage is necessary.

SRS Supplementary Data Release

Order Form

Check all that you wish to receive

- ☐ 1. Trends in graduate S&E enrollment, 1975–92
- ☐ 2. By enrollment status (full-time/part-time)
- ☐ 3. By source of major support
- ☐ 4. By mechanism of support
- ☐ 5. By sex
- ☐ 6. By level of enrollment
- ☐ 7. By citizenship
- ☐ 8. By racial/ethnic background
- ☐ 9. By institutional highest degree granted
- ☐ 10. By type of institutional control
- ☐ 11. By geographic distribution
- ☐ 12. Individual institution listings
- ☐ 13. Postdoctorates and other nonfaculty research personnel (doctorate-granting institutions only)
- ☐ 14. In historically black colleges and universities
- ☐ 15. In land grant institutions
- ☐ 16. In health-related schools
- ☐ 17. Science fields
- ☐ 18. Engineering fields
